

mPay Gateway delivers patient payments at the point of care.

PAYMENT PLAN

Patient payments are the fastest growing portion of a providers' revenue stream and have the lowest collection rates. Typically, 50% of the patient payments are written off as bad debt. mPay Gateway focuses on patient payments at the point of care.

With mPay Gateway you can offer patients a payment plan when they are unable to authorize or pay the full amount at the point of service. Collect all patient payments with one, easy process, including co-payments, co-insurance, deductibles and prior balances.

WITH PAYMENT PLAN YOU CAN:

- Create a payment plan for patients on the day of service
- Move a prior patient balance to a payment plan
- Address patient responsibility for pre-scheduled procedures

BENEFITS:

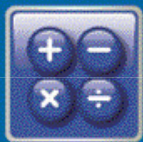

Practice:

- Offer a payment option to patients when they are unable pay the full amount
- Increased collections rates
- Reduce patient bad debt and increase profitability of your practice

Patients:

- Choose the credit card, date and scheduled monthly amount
- Worry free automated payments
- Clear summary of charges and payment schedule

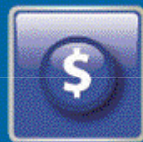

mPay Gateway calculates the patient's responsibility at the time of the visit and allows you to receive authorization from the patient for payment before they leave the office.

Step 1: Calculate

Step 2: Validate

Step 3: Collect

mPay Gateway's payment calculator instantly determines the service charges for your patient.

Review summary of charges with your patient, then, swipe their payment card.

When you receive the provider remittance, use mPay Gateway to collect the exact amount patient owes. The money will be sent directly to your bank.
