

mPay Gateway delivers patient payments at the point of care.

PRACTICE MANAGEMENT INTERFACE

You rely on your practice management system to guide office workflow. As collecting payments from patients becomes part of your standard patient encounter, having the right information at your fingertips is vital. mPay Gateway delivers that information with a real-time interface to your existing practice management system.

mPay Gateway's practice management system interface works with any HL7 compliant system and makes it simple to keep all patient information in one place. By eliminating duplicate entry of patient information, you can check-in or check-out patients faster and improve collections.

WITH THE PM INTERFACE YOU CAN:

- Shorten the patient check-in or check-out process
- Improve the accuracy of patient information
- Make it easier to start collecting patient payments

BENEFITS:

Practice:

- Eliminate the need to re-enter appointment and patient information
- Reduce keystroke errors
- Accurate patient information

Patients:

- Spend less time filling out forms
- No more correcting wrong information
- Simplify visits to your health care provider

mPay Gateway calculates the patient's responsibility at the time of the visit and allows you to receive authorization from the patient for payment before they leave the office.

Step 1: Calculate

mPay Gateway's payment calculator instantly determines the service charges for your patient.

Step 2: Validate

Review summary of charges with your patient, then, swipe their payment card.

Step 3: Collect

When you receive the provider remittance, use mPay Gateway to collect the exact amount patient owes. The money will be sent directly to your bank.
